SUPER AVENGER MILITARY LIMITED SERIES

An elite force

A concentrated blend of power, precision and functionality, the new Super Avenger Military chronograph by Breitling certainly lives up to its name. Its rugged steel case, water-resistant to 300 meters (1,000 ft), features an ultra-resistant carbon-based black coating. The result is a non-reflective stealth look clearly geared up for the most extreme missions. The equally black dial provides a 24-hour "military time" display to avoid any potential confusion in the heat of action. The offroader strap is made of a durable and comfortable synthetic fabric such as those adopted for their operations by the elite armed forces. Issued in a 500-piece limited edition, the Super Avenger Military is also distinguished by its screwed-in pushpiece guards, its large screw-locked crown with non-slip grip guaranteeing maximum functionality; its thick glareproofed sapphire crystal, as well as the oversized hands, hour-markers and numerals ensuring optimal readability. A true instrument for professionals, it is equipped with a selfwinding movement chronometer-certified by the COSC (Swiss Official Chronometer Testing Institute) – the highest official benchmark in terms of precision and reliability, as well as the only one based on an international norm. Super Avenger Military: an elite force on the wrist.

Movement: Breitling Caliber 22, officially chronometer-certified by the COSC, selfwinding, high-frequency (28,800 vibrations per hour), 38 jewels. 1/4th second chronograph, 30-minute and 12-hour totalizers.
