

## NAVITIMER 1884

### A milestone chronograph

**A tribute to Breitling's rich history, the Navitimer 1884 limited series combines the famous 1952 aviation slide rule with a calendar featuring a pointer-type date display and twin day/month apertures for which the brand was renowned in the 1940s. A modern and original face for fans of exclusive watches.**

1884 is first and foremost a date: that of the founding of Breitling by Léon Breitling, a keen devotee of chronographs and precision instruments. 1884 is now a watch, a limited series of the famous Navitimer perfectly summing up Breitling's vocation and its range of passions.

The conquest of the air, with the circular aviation slide rule that made the Navitimer the cult watch among pilots and dedicated aviation enthusiasts.

Useful, user-friendly functions, with a complete calendar displaying the day and the month through twin apertures at 12 o'clock, and the date by means of a central pointer tipped with a moon crescent: a system known as Datora that became a 1940s Breitling bestseller.

Technical and powerful designs, with an all-black dial made using the "par épargne" technique on a solid silver base enlivened with red accents.

Performance, with a selfwinding chronograph movement chronometer-certified by the COSC (Swiss Official Chronometer Testing Institute), the benchmark in terms of reliability and precision.

This model features an interesting practical detail in the shape of a 9 o'clock small seconds subdial providing an additional 24-hour "military-time" display much favored by pilots and which also facilitates calendar adjustment by distinguishing between day and night.

Issued in a 1,884-piece limited series, this Navitimer 1884 stands out with its generous 46 mm case accentuating the character of the design, as well as optimizing dial readability. In addition to the choice of a bracelet or a leather or crocodile leather strap, this model is also available with a new black rubber strap featuring an aircraft tire-tread motif.

**Movement:** Breitling Caliber 21, officially chronometer-certified by the COSC, selfwinding, high-frequency (28,800 vibrations per hour), 25 jewels. 1/4<sup>th</sup> of a second chronograph, 30-minute and 12-hour counters. Calendar with date hand and twin day & month apertures. **Case:** steel (limited series of 1,884). Resistance to 3 bars. Rotating bezel with circular slide rule. Cambered sapphire crystal, glareproofed on both sides. Diameter: 46 mm. **Dial:** black. **Straps/Bracelet:** leather, crocodile leather, rubber Navitimer/Navitimer.
