

CLASSIC FUSION

All Ceramic

A collection of timeless must-have pieces with the Hublot insignia, the Classic Fusion now incorporates a black ceramic bracelet. Available in chronograph or three-hand date mode with a matt black or glossy blue dial, this unisex “Art of Fusion” icon has the laid-back style of a perfectly designed classic.

The bracelet plays a major role in the look of a watch and is an essential design element, having perfect integration into the case and the high-tech materials used in the manufacture. Strong but lightweight black ceramic is used to create the case and bracelet in a unique fusion of technology and style that remains the secret of Hublot and its pioneering spirit. Almost 15 years ago, it was one of the first to explore the exceptional properties of this hypoallergenic, imperishable, stainless material and to invent unique applications and processes.

Today, the avant-garde spirit and desire for constant improvement that infuses every Hublot creation is revealed in the form of a new bracelet in ceramic zirconium oxide. Smart, robust, light and comfortable, it blends beautifully with the case, which is also made of high-tech ceramic.

Technically advanced and with a natural look, this bracelet with a secure folding clasp is the perfect addition to the new Classic Fusion models. With its blue sunray or opaque black dial, chronograph or three-hand date functions, available in 45 or 42 mm diameter, the versatile elegance of this iconic collection makes it a contemporary classic.

Emblematic of the first disruptive designs created by Hublot in the 1980s, the Classic Fusion embodies its signature concept – The Art of Fusion – born at a time when the brand was already breaking new ground by combining precious and industrial materials. Each of the six references presented on this new ceramic bracelet are equipped with a mechanical movement with an automatic self-winding frequency of 4 Hz, for an autonomy of 42 hours, with an oscillating weight in skeletonised tungsten visible through the screwed-down sapphire case back.

The new must-have essential for the modern dandy.

CLASSIC FUSION CERAMIC INTEGRATED BLACK MAGIC BRACELET CHRONOGRAPH

Reference	520.CM.1170.CM
Diameter	45mm
Thickness	13.05mm
Water Resistance	5 ATM (50m)
Case	Satin-finished and polished black ceramic
Bezel	Satin-finished and polished black ceramic, with 6 H-shaped titanium screws
Crystal	Sapphire with anti-reflective treatment
Case back	Polished black ceramic with sapphire crystal
Dial	Mat black
Movement	HUB1143, self-winding chronograph movement
Date	Window at 6.00
Nb. of components	280 (59 jewels)
Power reserve	42 hours
Strap	Polished and satin-finished black ceramic bracelet Black-plated stainless steel deployant buckle clasp
