

OYSTER PERPETUAL
GMT-MASTER II

ROLEX

OYSTER PERPETUAL GMT-MASTER II

Rolex presents a world first with its new version of the Oyster Perpetual GMT-Master II equipped with a two-colour Cerachrom bezel insert in red and blue, combining the best in high technology with the iconic aesthetics of the original 1955 model. This colour combination, long considered impossible to create in ceramic, is a dream come true for enthusiasts of this emblematic model.

UNIQUE TWO-COLOUR CERACHROM BEZEL

A technological and aesthetic feat, the new red and blue Cerachrom bezel insert is obtained via a unique manufacturing process developed and patented by Rolex, which enables the production of a single-piece, bulk-coloured ceramic component in two distinct colours. This insert echoes the traditional two-colour bezel of the original GMT-Master and GMT-Master II models. An exceptional achievement on two counts, the innovation consists of creating a red ceramic disc – a colour that, in itself, is extremely difficult to obtain – and then locally modifying the chemical composition of each grain, right to the core of the ceramic, to change the red into blue over only half the insert with a perfectly clear demarcation between the two colours. The Rolex Cerachrom bezel inserts, introduced in 2005, have the advantage of being virtually scratch resistant, highly corrosion resistant, and their colour is unaffected by ultraviolet rays. Their diamond-polished surface offers a long-lasting lustre. The 24-hour graduation is engraved in the ceramic and coated with platinum via PVD (Physical Vapour Deposition).

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ROBUSTNESS

The GMT-Master II's 40 mm Oyster case, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness, proportion and elegance. The characteristically shaped middle case is crafted from a solid block of 18 ct white

gold, cast by Rolex in its own foundry. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Triplock triple waterproofness system, screws down securely against the case. It is protected by a crown guard that forms an integral part of the middle case. The crystal, with a Cyclops lens at 3 o'clock for easy reading of the date, is made of virtually scratchproof sapphire. The waterproof Oyster case provides optimal protection for the GMT-Master II's high-precision movement.

CALIBRE 3186, A SUPERLATIVE CHRONOMETER

The GMT-Master II is equipped with calibre 3186, a self-winding mechanical movement with a second time zone function and date display entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 3186 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. Its design and quality manufacture ensure peerless precision and reliability. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise in case of shocks than a traditional hairspring.

SOLID-LINK BRACELET AND SAFETY CLASP

The new GMT-Master II is fitted with a solid-link Oyster bracelet in 18 ct white gold, with an Oysterlock safety clasp that prevents accidental opening. It also features the ingenious Rolex-patented Easylink rapid extension system that allows the wearer to easily increase the bracelet length by approximately 5 mm, for additional comfort in any circumstance.

CLASP	Oysterlock folding safety clasp Easylink 5 mm comfort extension link

OYSTER PERPETUAL
SEA-DWELLER 4000

ROLEX

OYSTER PERPETUAL SEA-DWELLER 4000

A legend among divers' watches is reborn as Rolex brings back a contemporary version of the Oyster Perpetual Sea-Dweller, a model created by the brand in 1967. This 40 mm technical divers' watch, waterproof to a depth of 1,220 metres (4,000 feet), features the latest in Rolex innovation: Cerachrom bezel insert in ceramic, long-lasting Chromalight luminescence, paramagnetic blue Parachrom hairspring, Oysterlock safety clasp and Rolex Glidelock bracelet extension system. Originally designed for the pioneers of professional deep-sea diving, the Sea-Dweller 4000 is equipped with one of the inventions that contributed to its stature: the helium escape valve, patented by Rolex in 1967. This ingenious safety valve releases helium from the watch case as the gas expands during the decompression phases of deep-water saturation dives, while preserving the waterproofness of the watch.

CERAMIC BEZEL INSERT AND LONG-LASTING LUMINESCENT DISPLAY

The Sea-Dweller 4000's 60-minute graduated, unidirectional, rotatable bezel enables divers to precisely and safely monitor their dive and decompression times. It is equipped with a patented black Cerachrom bezel insert manufactured by Rolex in a virtually scratchproof ceramic whose colour is unaffected by ultraviolet rays. The graduation is coated via PVD (Physical Vapour Deposition) with a thin layer of platinum. The sleek black dial features large Chromalight hour markers and hands filled with luminescent material that emits a long-lasting blue glow for excellent legibility in dark conditions.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS

The Sea-Dweller 4000's Oyster case, guaranteed waterproof to a depth of 1,220 metres (4,000 feet), is a paragon of robustness and reliability. The characteristically shaped middle case is crafted from a solid block of particularly corrosion-resistant 904L steel. The fluted case back is hermetically screwed down

with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Triplock triple waterproofness system, screws down securely against the case, offering watertight security akin to a submarine's hatch. It is protected by a crown guard that is an integral part of the middle case. The crystal is made of virtually scratchproof sapphire. The waterproof case of the Sea-Dweller 4000, housing its high-precision movement, ensures optimal protection from water, dust, pressure and shocks.

CALIBRE 3135, A SUPERLATIVE CHRONOMETER

The new Sea-Dweller 4000 is equipped with calibre 3135, a self-winding mechanical movement with a date display entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 3135 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. Its architecture, like that of all Oyster watch movements, makes it singularly reliable. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise in case of shocks than a traditional hairspring.

ADJUSTABLE BRACELET WITH SAFETY CLASP

The Sea-Dweller 4000's Oyster bracelet is equipped with an Oysterlock safety clasp that prevents accidental opening, and with a double extension system that allows the watch to be worn comfortably over a diving suit up to 7 mm thick. The Fliplock extension link extends the bracelet by 26 mm, while the Rolex Glidelock system allows fine adjustments of the bracelet length in 2 mm increments for a total of approximately 20 mm. Neither of them requires the use of tools.

OYSTER PERPETUAL
SKY-DWELLER

ROLEX

OYSTER PERPETUAL SKY-DWELLER

Rolex is presenting three new versions of the Oyster Perpetual Sky-Dweller, its most recent and most innovative model boasting 14 patents, which was launched in 2012. The new versions in 18 ct yellow, white and Everose gold in a 42 mm case expand the existing collection by introducing new exclusive dials combined with new combinations of bracelets and leather straps.

MASTERING TIME AND SPACE

A classic watch for world travellers, the Sky-Dweller is a compelling timepiece of revolutionary design that blends to perfection iconic aesthetics, technological sophistication and ease of use. This model with a strong Rolex identity combines a dual time zone display, as intuitive to read as it is simple to use, with a particularly reliable and innovative annual calendar that automatically displays the correct date throughout the year – needing only one adjustment on 1 March. Function setting is straightforward and carried out via the fluted Ring Command bezel, by turning it to the corresponding position to adjust the local time, the reference time or the date, and then using the winding crown to perform the settings.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ELEGANCE

The Sky-Dweller's 42 mm Oyster case, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness, proportion and elegance. The characteristically shaped middle case is crafted from a solid block of 18 ct yellow, white or Everose gold, cast by Rolex in its own foundry. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Twinlock double waterproofness system, screws down securely against the case. The crystal, with a Cyclops lens at 3 o'clock

for easy reading of the date, is made of virtually scratchproof sapphire. The waterproof Oyster case provides optimal protection for the Sky-Dweller's high-precision movement.

CALIBRE 9001, A SUPERLATIVE CHRONOMETER

The Sky-Dweller is equipped with calibre 9001, a self-winding mechanical movement with a dual time zone display and annual calendar entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 9001 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. Its design and quality manufacture ensure peerless precision and reliability. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise in case of shocks than a traditional hairspring.

LEATHER STRAPS OR OYSTER BRACELET

The new versions of the Sky-Dweller in 18 ct yellow or white gold are paired respectively with brown or black alligator leather straps and with an 18 ct yellow or white gold Oysterclasp. The 18 ct Everose gold version is fitted on an 18 ct Everose gold solid-link Oyster bracelet with an Oysterclasp. The Oyster bracelet also features the ingenious Rolex-patented Easylink rapid extension system that allows the wearer to easily increase the bracelet length by approximately 5 mm, for additional comfort in any circumstance.

OYSTER PERPETUAL
DATEJUST PEARLMASTER 34

ROLEX

OYSTER PERPETUAL DATEJUST PEARLMASTER 34

Rolex is introducing new gem-set versions of the Oyster Perpetual Datejust Pearlmaster 34 in 18 ct yellow, white and Everose gold. Rolex's watchmaking art is stunningly combined with the captivating charms of gold and the purest, most scintillating of diamonds. Rolex's mastery in gem-setting is founded on the same standards of excellence that have earned the brand its unrivalled place at the pinnacle of watchmaking.

The dials of these exquisite 34 mm watchmaking masterpieces are entirely paved with diamonds. The nobility of the time display is enhanced by the bezel adorned with baguette-cut pink sapphires on the 18 ct yellow gold version, or with baguette-cut blue sapphires on the 18 ct white gold version. The version in 18 ct Everose gold – an exclusive pink gold alloy created by Rolex in its own foundry – is distinguished by a splendid bezel with brilliant-cut diamonds set in 18 ct white gold to accentuate their splendour. These three versions may also be fitted with diamond-set bracelets.

ROLEX – A MASTER OF GEM-SETTING

Only gems of the highest quality are deemed worthy to be set on a Rolex watch. The purest diamonds and sapphires are selected according to the most rigorous criteria and set in keeping with the finest traditions to ensure the most intense radiance. Rolex has its own gemmology laboratory in which experienced specialists backed by state-of-the-art equipment control the quality of precious stones according to the most exacting standards; barely one per cent of worldwide diamond production meets the Rolex quality criteria. The stones are then entrusted to the in-house master gem-setters, experts in the art of exalting their natural lustre. Rolex has its own foundry where it creates its own gold alloys from the purest raw materials: 18 ct yellow, white or Everose gold. From casting the gold to shaping and polishing it, the entire process is conducted with extreme care in the brand's workshops in order to guarantee the Rolex standards of quality. Thanks to this comprehensive in-house mastery and such stringent benchmarks at all stages of production, Rolex gem-set watches shine with truly incomparable magnificence.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ELEGANCE

The jewelled refinement of the Oyster Perpetual Datejust Pearlmaster 34 only complements its technical excellence as a Rolex watch. Its Oyster case, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness, proportion and elegance. The characteristically shaped middle case is crafted from a solid block of 18 ct gold. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Twinlock double waterproofness system, screws down securely against the case. The crystal, with a Cyclops lens at 3 o'clock for easy reading of the date, is made of virtually scratchproof sapphire. The waterproof Oyster case provides optimal protection for the Datejust Pearlmaster 34's high-precision movement.

CALIBRE 2236, A SUPERLATIVE CHRONOMETER

The new Oyster Perpetual Datejust Pearlmaster 34 is the first model equipped with calibre 2236 and the new Syloxi hairspring in silicon developed by Rolex, which endows it with a level of chronometric performance rarely seen on a woman's watch. This self-winding mechanical movement with date display is entirely manufactured by Rolex and inaugurates a new generation of movements for Rolex ladies' models. Its design and quality manufacture ensure peerless precision and reliability. Like all Rolex Perpetual movements, the 2236 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests.

PERFECTION THROUGH TO THE BRACELET

With delightfully rounded solid links in 18 ct gold, the Pearlmaster bracelet contributes to the watch's individual character and offers the wearer maximum comfort. It is equipped with a concealed Crownclasp that is both elegant and functional. On certain versions, the intermediate bracelet links are sublimely set with diamonds of the highest quality. A subtle echo of the bezel, this superb gem setting provides the finishing touch to an authentic and very feminine archetype of watchmaking.

OYSTER PERPETUAL
COSMOGRAPH DAYTONA

ROLEX

OYSTER PERPETUAL COSMOGRAPH DAYTONA

Rolex presents a new jewelled version of the Oyster Perpetual Cosmograph Daytona that combines the nobility of 950 platinum and the radiance of purest-quality diamonds. The dial is entirely paved with diamonds, apart from the ice blue chronograph counters. Rolex reserves this rare and exclusive colour for platinum models. The resplendent bezel is set with 36 baguette-cut diamonds.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ROBUSTNESS

The Cosmograph Daytona's 40 mm Oyster case, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness, proportion and elegance. The characteristically shaped middle case is crafted from a solid block of 950 platinum, the noblest of precious metals. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Triplock triple waterproofness system, screws down securely against the case. It is protected by a crown guard that forms an integral part of the middle case. The pushers also screw down securely against the case. The crystal is made of virtually scratchproof sapphire. The waterproof Oyster case provides optimal protection for the Cosmograph Daytona's high-precision movement.

CALIBRE 4130, CHRONOGRAPH AND SUPERLATIVE CHRONOMETER

The Cosmograph Daytona is equipped with calibre 4130, a self-winding mechanical chronograph movement with a column wheel entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 4130 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. Its design and quality manufacture ensure peerless precision and reliability. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise in case of shocks than a traditional hairspring.

SOLID-LINK BRACELET AND SAFETY CLASP

This new Cosmograph Daytona is fitted with a solid-link Oyster bracelet in 950 platinum, with an Oysterlock safety clasp that prevents accidental opening. The bracelet also features the ingenious Rolex-patented Easylink rapid extension system that allows the wearer to easily increase the bracelet length by approximately 5 mm, for additional comfort in any circumstance.

PRECISION	Officially certified Swiss chronometer (COSC)
FUNCTIONS	Centre hour and minute hands, small seconds hand at 6 o'clock Chronograph (centre hand) accurate to within 1/5 of a second 30-minute counter at 3 o'clock and 12-hour counter at 9 o'clock Stop-seconds for precise time setting
OSCILLATOR	Frequency: 28,800 beats/hour (4Hz) Paramagnetic blue Parachrom hairspring Breguet overcoil Large balance wheel with variable inertia High-precision regulating via four gold Microstella nuts Traversing balance bridge
JEWELLING	44 rubies
POWER RESERVE	Approximately 72 hours
	DIAL
MATERIAL	Paved with 437 diamonds
COUNTERS	Ice blue, 18 ct white gold border
HOURL MARKERS	Highly legible Chromalight appliques (long-lasting luminescence) in blued 18 ct white gold
HANDS	Blued 18 ct white gold
	BRACELET
TYPE	Oyster three-piece solid links
MATERIAL	950 platinum, polished centre links, satin-finished outer links with polished edges
CLASP	Oysterlock folding safety clasp Easylink 5 mm comfort extension link

OYSTER PERPETUAL
MILGAUSS

ROLEX

OYSTER PERPETUAL MILGAUSS

Rolex is presenting a new version of the Oyster Perpetual Milgauss with unique and symbolic aesthetics. Its green sapphire crystal marked a first in watchmaking when it was introduced on the Milgauss in 2007. Now this crystal is combined with an electric blue dial, an allusion to the emblematic lightning-bolt-shaped seconds hand and the watch's technical purpose as a paramagnetic timepiece designed for engineers and scientists in the 1950s, a golden age of scientific research. Seen through the green sapphire crystal, the Z blue dial takes on a powerfully attractive magnetic hue.

AN AVANT-GARDE WATCH

Ever since its launch, the Milgauss has remained an avant-garde watch. It was created in 1956 for engineers and technicians who are exposed in their work to magnetic fields which disrupt the performance of mechanical watches. It was designed to resist strong interference of up to 1,000 gauss, hence its name – *mille* being French for thousand – while maintaining its performance and precision as an officially certified chronometer. A pioneer in magnetic resistance, it became known as the watch worn by scientists at the European Organization for Nuclear Research (CERN) in Geneva and gained a reputation as the ultimate watch of science and technological progress. Several innovations contribute to its resistance to magnetism. The first line of defence is a shield made of ferromagnetic alloys which surrounds the movement within the Oyster case, an invention patented by Rolex in 1954. The second line of defence involves two of the movement's key components, the oscillator and the escapement, which are made of innovative paramagnetic materials developed by Rolex since the 2000s.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ROBUSTNESS

The 40 mm Oyster case of the Milgauss, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness and reliability. The characteristically shaped middle case is crafted from a solid block of particularly corrosion-resistant

904L steel. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Twinlock double waterproofness system, screws down securely against the case. The crystal is made of virtually scratchproof green sapphire. The waterproof Oyster case provides optimal protection for the Milgauss's high-precision movement.

CALIBRE 3131, A SUPERLATIVE PARAMAGNETIC CHRONOMETER

The Milgauss is equipped with calibre 3131, a self-winding mechanical movement entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 3131 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. It includes Rolex-patented components to guarantee the level of resistance to magnetic interference for which it is named. The escapement of the Milgauss features a paramagnetic escape wheel made of a nickel-phosphorus alloy. This component is produced using a micromanufacturing technology (UV-LIGA) that is entirely mastered in-house. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise than a traditional hairspring in case of shocks.

THE OYSTER BRACELET, COMFORTABLE AND SECURE

The Oyster bracelet of the Oyster Perpetual Milgauss is very secure and comfortable to wear. It is equipped with a folding Oysterclasp, designed by Rolex. It also features the ingenious Rolex-patented Easylink rapid extension system that allows the wearer to easily increase the bracelet length by approximately 5 mm, for additional comfort in any circumstance.

MILGAUSS**

Reference (case – bracelet):
116400 GV – 72400

TYPE	CASE Oyster (monobloc middle case, screw-down case back and winding crown) Internal magnetic shield to protect the movement
DIAMETER	40 mm
MATERIAL	904L stainless steel superalloy, polished finish
CASE BACK	Screw-down with Rolex fluting
BEZEL	Smooth
WINDING CROWN	Screw-down, Twinlock double waterproofness system
CRYSTAL	Scratch-resistant green sapphire
WATERPROOFNESS	100 metres (330 feet)
	MOVEMENT
CALIBRE	3131, <i>Manufacture Rolex</i> Mechanical movement with bidirectional self-winding via Perpetual rotor
PRECISION	Officially certified Swiss chronometer (COSC)
FUNCTIONS	Centre hour, minute and seconds hands Stop-seconds for precise time setting
OSCILLATOR	Frequency: 28,800 beats/hour (4Hz) Paramagnetic blue Parachrom hairspring Breguet overcoil Large balance wheel with variable inertia Paramagnetic nickel-phosphorus escape wheel High-precision regulating via four gold Microstella nuts Traversing balance bridge
JEWELLING	31 rubies
POWER RESERVE	Approximately 48 hours
	DIAL
COLOUR	Z blue
HOURLY MARKERS	Highly legible Chromalight appliques (long-lasting luminescence) in 18 ct white gold
HANDS	Chromalight hands in 18 ct white gold, orange lightning-bolt-shaped seconds hand
	BRACELET
TYPE	Oyster, three-piece solid links
MATERIAL	904L stainless steel superalloy, polished centre links, satin-finished outer links with polished edges
CLASP	Folding Oysterclasp Easylink 5 mm comfort extension link

OYSTER PERPETUAL

OYSTER PERPETUAL

Rolex is introducing updated versions of its quintessential Oyster Perpetual model in 31 and 36 mm featuring exclusive new dials. The Oyster Perpetual – the purest expression of the Oyster concept and having no other function than a clear, accurate time display – comprises the renowned Rolex waterproof Oyster case and the self-winding Rolex Perpetual movement famed for its precision and reliability. The Oyster Perpetual is an officially certified chronometer endowed with all the fundamental attributes of the Oyster collection and affords full access to the Rolex legend. This model stands out with its eye-catching new dials in elegant and sporty colours.

THE OYSTER CASE, SYMBOL OF WATERPROOFNESS AND ROBUSTNESS

The Oyster Perpetual's Oyster case, guaranteed waterproof to a depth of 100 metres (330 feet), is a paragon of robustness and reliability. The characteristically shaped middle case is crafted from a solid block of particularly corrosion-resistant 904L steel. The fluted case back is hermetically screwed down with a special tool exclusive to Rolex watchmakers. The winding crown, fitted with the patented Twinlock double waterproofness system, screws down securely against the case. The crystal is made of virtually scratchproof sapphire. The waterproof Oyster case provides optimal protection for the Oyster Perpetual's high precision movement.

CALIBRE 3130, A SUPERLATIVE CHRONOMETER

The 36 mm Oyster Perpetual is equipped with calibre 3130, a self-winding mechanical movement entirely developed and manufactured by Rolex. Like all Rolex Perpetual movements, the 3130 is a certified Swiss chronometer, a designation reserved for high-precision watches that have successfully passed the Swiss Official Chronometer Testing Institute (COSC) tests. Its design and quality manufacture ensure peerless precision and reliability. The oscillator, the true heart of the watch, has a blue Parachrom hairspring patented and manufactured by Rolex in an exclusive alloy of niobium and zirconium. Insensitive to magnetic fields, the Parachrom hairspring offers great stability when exposed to temperature variations and remains up to 10 times more precise in case of shocks than a traditional hairspring.

THE OYSTER BRACELET, COMFORTABLE AND SECURE

The Oyster Perpetual watches are paired with a solid-link Oyster bracelet in 904L steel which is very secure and comfortable to wear. The bracelet is equipped with a folding Oysterclasp designed by Rolex.
